

**Список публикаций к.б.н. Вороновой Анастасии Николаевны,**  
ведущего научного сотрудника лаборатории по изучению ихтиопатогенов водных  
биологических ресурсов Тихоокеанского филиала Федерального государственного  
бюджетного научного учреждения «Всероссийский научно-исследовательский институт  
рыбного хозяйства и океанографии» (ТИНРО)  
по теме диссертации в рецензируемых научных изданиях за 2018–2023 гг.

1. Vainutis K.S., **Voronova A.N.**, Mironovsky A.N., Zhigileva O.N., Zhokhov A.E. The species diversity assessment of *Azygia* Looss, 1899 (Digenea: Azygiidae) from the Volga, Ob, and Artyomovka Rivers Basins (Russia), with description of *A. sibirica* n. sp. // Diversity. 2023. Vol. 15. Article No. 119.
2. Vainutis K.S., **Voronova A.N.**, Urabe M., Kazarin V.M. Integrative approach for discovering of new species within the genus *Allocreadium* Looss, 1900 (Trematoda: Allocreadiidae) and framing of biogeographical hypotheses for the genus // Systematic Parasitology. 2023. Vol. 100. P. 189–213.
3. **Voronova A.N.**, Vainutis K.S., Tabakaeva T.V., Sapotsky M.V., Kakareka N.N., Volkov Y.G., Galkina I.V., Shchelkanov M.Y. Molecular identification of the trematode *P. ichunensis* stat. n. from lungs of siberian tigers justified reappraisal of *Paragonimus westermani* species complex // Journal of Parasitological Diseases. 2022. Vol. 46, № 3. P. 744–753.
4. Vainutis K.S., **Voronova A.N.**, Shchelkanov M.Y., Duscher G.G., Shchelkanov E.M. Origins, phylogenetic relationships and host-parasite interactions of Troglotrematoidea since the Cretaceous // Infection, Genetics and Evolution. 2022. Vol. 101. Article No. 105274.
5. Safonova A.E., **Voronova A.N.**, Vainutis K.S. First report on molecular identification of *Anisakis simplex* in *Oncorhynchus nerka* from the fish market, with taxonomical issues within Anisakidae // Journal of Nematology. 2021. Vol. 53. Article No. e2021-023.
6. Vainutis K.S., **Voronova A.N.**, Urabe M. Systematics of *Crepidostomum* species from the Russian Far East and northern Japan, with description of a new species and validation of the genus *Stephanophiala* // Parasitology International. 2021. Vol. 84. Article No. 104042. Doi: 102412. 10.1016/j.parint.2021.102412
7. **Voronova A.N.**, Chelomina G.N. The SSU rRNA secondary structures of the Plagiorchiida species (Digenea), its applications in systematics and evolutionary inferences // Infection, Genetics and Evolution. 2020. Vol. 78. Article No. 104042.
8. **Voronova A.N.**, Besprozvannykh V.V., Tatonova Y.V., Ngo H.D., Hung N.M., Plekhova N.G. *Paragonimus heterotremus* Chen et Hsia, 1964 (Digenea: Paragonimidae): species identification based on the biological and genetic criteria, and pathology of infection // Parasitology Research. 2020. Vol. 119, № 12. P. 4073–4088.
9. **Voronova A.N.**, Chelomina G.N. The high divergence of two morphologically similar trematode species of the genus *Nanophyetus* of salmonids from the data of mtDNA nad1 gene sequences // Russian Journal of Marine Biology. 2018. Vol. 44, № 2. P. 122–126.
10. **Voronova A.**, Chelomina G.N. Genetic diversity and phylogenetic relations of salmon trematode *Nanophyetus japonensis* // Parasitology International. 2018. Vol. 67, № 3. P. 267-276.
